CAVAN DONOHOE

Currently looking to improve your company's data workflow

I am currently working as a Senior Statistical Programmer Analyst in Menlo Park at GRAIL, Inc and love getting challenged at my current role. I have a level of expertise in both R and Excel that helps me both manipulate and analyze data as well as automate monthly tedious tasks. With the mind of a tutor, I make sure to document everything and answer questions quickly and efficiently when I explain my methodology to coworkers or clients. I am reaching out to companies and teams with needs for data science improvement to reduce human error and increase efficiency. Reach out to me if you have a project I can work on or just a conversation.

🎓 EDUCATION

2018

Bachelor of Science
University of California, Irvine 📍 Irvine, CA

- Major in Mathematics
- Minor in Statistics

💼 PROFESSIONAL EXPERIENCE

February 2021 -

Senior Statistical Programmer Analyst
GRAIL, Inc 📍 Menlo Park

- Creating and documenting new Derived Variables for ongoing studies using Git for collaboration and R for coding
- Performing Code Reviews and Independent Analysis for cancer and subject level datasets
- Creating new R Markdowns for documentation purposes and validations of dozens of TFLs (Tables, Figures, and Listings)
- Author new R Packages now used in production coding across company
- Provide statistical programming support to data cleaning and locking activities, pre-defined and exploratory analysis, formal reports, publications, presentations, and new statistical methodologies
- Work closely with biostatisticians to create data and analysis program specifications based on the statistical analysis plan (SAP)
- Maintain complete and auditable programming documentation for analysis of clinical studies
- Contribute to the development, documentation and maintenance of a reusable programming code library
- Create a timeline visualizer for significant cancer screenings and events leading to an eventual diagnosis using R Shiny Output
- Write unit tests to ensure programmatic updates will be compatible to previous versions

April 2020 | January 2021

Reporting Analyst
24 Hour Home Care 📍 El Segundo, CA

- Automated a weekly report that calculates the Accounts Receivable aging for our company. This weekly report is now being calculated in R and automatically sends an email formatted in HTML with CSS to show summary tables and a highlighted list of achievements
- Imported, Cleaned, Manipulated, and Visualized data for ad hoc dashboard requests
- Assumed role of Analytics team liaison to other teams within the company
- Automated batch invoice emails via R for use between teams to run
- Connected R to Azure Web App to allow for script driven data exports now allowing for automated exports saving teams hundreds of hours per year
